

No. 69-07/2008-CDMA/Vol II/pt

Dated 10.03.2010

To,

The CGMs  
All Telecom Circles / KOLTD/CHTD

Sub : Guidelines for Provisioning and Sale of prepaid CDMA RUIM for all type of services.

1. 14 circles have already migrated MSC based CDMA billing to GSM B&CCS and balance circles are in pipe line.
2. M/s Comverse as part of phase one has already made changes in the B&CCS to accommodate prepaid RUIM with 10 digit numbering scheme in East,west and North Zone. South zone will be ready along with migration of MSC based CDMA billing to GSM B&CCS. The Solution document given by M/s Comverse is placed below at as Annexure –1. M/s Comverse shall take care that the solution given is properly maintained and smoothly carried to next phase of implementation (provisioning).
3. IT cell BSNL has also made changes in the Sancharsoft to take care of sale of prepaid RUIM through Sancharsoft. The email confirmation from DGM IT Hyderabad is attached in Annexure –2.
4. M/s Comverse is still to make changes in the B&CCS for provisioning of services on RUIM and still working on the same. Till provisioning through B&CCS is through, provisioning of RUIM shall be done in bulk directly in WIN, HLR,SMSC, UMS, ANAAA and AAA etc.
5. The procedure for bulk provisioning of RUIM shall be same as existing in case of Normal CDMA prepaid connection. In case of West zone, WIN and PDSS terminals are already extended to respective circles. The circles can themselves provision the RUIMs in WIN, AAA, ANAA also. In other circles, Circle Nodal officer shall send the request to Zone Nodal officer for creation of RUIM in Common equipment (ANAAA, WIN, SMSC, UMS, etc).
6. The Prepaid RUIM shall be created with all services and facilities ( Voice, SMS, UMS, 1X data, EVDO data, STD, ISD roaming etc). The customer will have choice to use the RUIM in HHT, NIC or EVDO data card as per his choice.
7. The commercial procedure as followed for sale of GSM SIM shall be followed for CDMA RUIM. The handling and accounting of RUIM shall be same as GSM SIM. It is preferable that RUIM is handled by same official who is handling GSM SIM.
8. The Sale of RUIM to customer shall be from BSNL own point of sale initially using Sancharsoft and will be extended to DSA/PCO/Franchisee subsequently for which separate instruction shall be issued. The CAF data shall be captured in Sancharsoft as being done presently in case of GSM SIM. In case Sancharsoft is not ready in some circle, the CAF data shall be directly

captured in B&CCS in circles which have migrated to B&CCS and in local billing system in circles which are not yet migrated to B&CCS.

9. The CAF data stored in Sancharsoft shall be sent to B&CCS as it is done for GSM for circles who are already migrated to B&CCS. The CAF data for circles which have not migrated to B&CCS, will remain into Sancharsoft/local existing billing and will be migrated to B&CCS along with migration MSC based CDMA to GSM B&CCS.
10. In case of any query related to Sancharsoft, Sharan Melmalgi BSNL,6th floor Telephone Bhavan Saifabad Hyderabad 040-23233239 email [melmalgi@bsnl.co.in](mailto:melmalgi@bsnl.co.in) may be contacted.
11. In case of any query related to B&CCS, Sh. Suman Chandra of M/s Comverse email [Suman.Chandra@comverse.com](mailto:Suman.Chandra@comverse.com), Mobile 09903831517 may be contacted.
12. The above are the generic broad guidelines which may be suitably modified by circles if required.
13. A daily report about no. of RUIM provisioned and sold to customer shall be sent to corporate office for perusal of Dir (CM).
