Sub: Constitution of Committee to review Medical Policy.

Members of Executive Associations have also requested for representation in the Committee being constituted for review of Medical Policy. To constitute a purposeful committee, it would be appropriate to define the scope of the committee in advance to enable the Committee to focus on the issues and deliberate it in a fixed time-frame and come out with solutions/suggestions for implementation. Therefore, it has been decided to seek inputs from the recognised Unions and Executive Associations on the deficiencies observed in Medical policy and the difficulties faced by the employees and probable remedies/suggestions.
